# TalkShow® VS 4000

Multi-channel video calling, with broadcast-quality production control.

Instantly connect with multiple contacts around the world.

TalkShow VS 4000 is the professional, multi-channel video calling system designed to simultaneously connect you with up to 4 remote guests—regardless of location—in real time and deliver distraction-free, broadcast-quality HD content with complete production control.

Reach 300 million monthly Skype users with:

- 4 concurrent Skype video channels
- 4-in, 4-out HD-SDI connections
- Integrated NDI® technology supporting input and output over IP
- Integrated support for Dante™ network audio input
- Tally notification on all call channels
- The most complete audio and video capabilities

More live guests.  
More compelling conversations.

Facilitate captivating real-time group conversations, panel discussions, and live interview after live interview with remote guests that enhance the quality and credibility of your program.

Independent call management and production control interfaces

Advanced color configuration and video controls

Per-channel and group Talk Back communication
